

The Geological Society of America Bulletin is a leading international journal for major scholarly research in all branches of the earth sciences. Published continuously since 1890.

## T A B L E O F C O N T E N T S

### PALEOCLIMATOLOGY

- 771 **Lower Cretaceous cold snaps led to widespread glendonite occurrences in the Sverdrup Basin, Canadian High Arctic**  
Stephen E. Grasby, Gennynne E. McCune, Benoit Beauchamp, and Jennifer M. Galloway
- 788 **Extensive Early Cretaceous (Albian) methane seepage on Ellef Ringnes Island, Canadian High Arctic**  
Krista Williscroft, Stephen E. Grasby, Benoit Beauchamp, Crispin T.S. Little, Keith Dewing, Daniel Birgel, Terry Poulton, and Krzysztof Hryniewicz

### LIMNOGEOLOGY

- 806 **A 40,000 yr record of clay mineralogy at Lake Towuti, Indonesia: Paleoclimate reconstruction from reflectance spectroscopy and perspectives on paleolakes on Mars**  
Timothy A. Goudge, James M. Russell, John F. Mustard, James W. Head, and Satria Bijaksana

### QUATERNARY GEOLOGY/GEOMORPHOLOGY

- 820 **Climatic and glacial impact on erosion patterns and sediment provenance in the Himalayan rain shadow, Zaskar River, NW India**  
Tara N. Jonell, Andrew Carter, Philipp Böning, Katharina Pahnke, and Peter D. Clift<sup>1</sup>
- 837 **Along-strike variation in catchment morphology and cosmogenic denudation rates reveal the pattern and history of footwall uplift, Main Gulf Escarpment, Baja California**  
Matthew W. Rossi, Mark C. Quigley, John M. Fletcher, Kelin X. Whipple, J. Jesús Diaz-Torres, Christian Seiler, L. Keith Fifield, and Arjun M. Heimsath

### TECTONICS

- 855 **Path and amount of dextral fault slip in the Eastern California shear zone across the central Mojave Desert**  
Joseph E. Andrew and J. Douglas Walker

### PETROLOGY

- 869 **Miocene orbicular diorite in east-central Himalaya: Anatexis, melt mixing, and fractional crystallization of the Greater Himalayan Sequence**  
Zhang Zeming, Xiang Hua, Ding Huixia, Dong Xin, Gou Zhengbin, Tian Zhulin, and M. Santosh

### STRATIGRAPHY

- 886 **New age constraints for early Paleogene strata of central Patagonia, Argentina: Implications for the timing of South American Land Mammal Ages**  
J. Marcelo Krause, William C. Clyde, Mauricio Ibañez-Mejía, Mark D. Schmitz, Timothy Barnum, Eduardo S. Bellosi, and Peter Wilf

### PRECAMBRIAN GEOLOGY

- 904 **Neoproterozoic backarc basin on the southeastern margin of the Yangtze block during Rodinia assembly: New evidence from provenance of detrital zircons and geochemistry of mafic rocks**  
Feng-Feng Zhang, Xiao-Lei Wang, Di Wang, Jin-Hai Yu, Xiao-Hua Zhou, and Zi-Ming Sun

### ECONOMIC GEOLOGY

- 920 **Geology of the Don Manuel igneous complex, central Chile: Implications for igneous processes in porphyry copper systems**  
Amy K. Gilmer, R.S.J. Sparks, Alison C. Rust, Simon Tapster, Adam D. Webb, and Dan N. Barford

### GEOCHRONOLOGY

- 947 **Mesozoic felsic volcanic rocks from the North China craton: Intraplate magmatism associated with craton destruction**  
Xiao-Fang He, M. Santosh, and Sohini Ganguly

### STRUCTURAL GEOLOGY

- 970 **Stratigraphy and structure of the Eocene Memphis Sand above the eastern margin of the Reelfoot rift in Tennessee, Mississippi, and Arkansas, USA**  
Richard V. Martin and Roy B. Van Arsdale

### PALEOCLIMATOLOGY

- 997 **Clay mineralogical constraints on weathering in response to early Eocene hyperthermal events in the Bighorn Basin, Wyoming (Western Interior, USA)**  
Chaowen Wang, Rieko Adriaens, Hanlie Hong, Jan Elsen, Noël Vandenberghe, Lucas J. Lourens, Philip D. Gingerich, and Hemmo A. Abels

### COMMENT AND REPLY

- 1012 **Integrated stratigraphic, geochemical, and paleontological late Ediacaran to early Cambrian records from southwestern Mongolia: Comment**  
Ed Landing and Peter D. Kruse
- 1016 **Integrated stratigraphic, geochemical, and paleontological late Ediacaran to early Cambrian records from southwestern Mongolia: Reply**  
E.F. Smith, F.A. Macdonald, T.A. Petach, and U. Bold
- 1019 **Depositional history, tectonics, and provenance of the Cambrian-Ordovician boundary interval in the western margin of the North China block: Comment**  
Jeong-Hyun Lee and Seung-bae Lee
- 1022 **Depositional history, tectonics, and provenance of the Cambrian-Ordovician boundary interval in the western margin of the North China block: Reply**  
Paul M. Myrow, Jitao Chen, Zachary Snyder, Stephen Leslie, David A. Fike, C. Mark Fanning, Jinliang Yuan, and Peng Tang

### The Geological Society of America Bulletin

(ISSN 0016-7606 USPS 216-300 CODEN BUGMA) is published bimonthly by The Geological Society of America, Inc. (GSA), with offices at 3300 Penrose Place, Boulder, Colorado. Mailing address is P.O. Box 9140, Boulder, CO 80301-9140, USA. Periodicals postage paid at Boulder, Colorado, and at additional mailing offices. Postmaster: Send address changes to *GSA Bulletin*, Sales & Service, P.O. Box 9140, Boulder, CO 80301-9140, USA, or e-mail to [gsaservice@geosociety.org](mailto:gsaservice@geosociety.org).

Copyright not claimed on content prepared wholly by U.S. government employees within the scope of their employment. Individual scientists are hereby granted permission, without fees or further requests to GSA, to use a single figure, a single table, and/or a brief paragraph of text in other subsequent works and to make unlimited photocopies of items in this journal for noncommercial use in classrooms to further education and science. In addition, an author has the right to use his or her article or a portion of the article in a thesis or dissertation without requesting permission from GSA, provided the bibliographic citation and the GSA copyright credit line are given on the appropriate pages. For any other form of capture, reproduction, and/or distribution of any item in this journal by any means, contact: Permissions, GSA, P.O. Box 9140, Boulder, CO 80301-9140, USA, fax +1-303-357-1073, [editing@geosociety.org](mailto:editing@geosociety.org); reference *GSA Bulletin*, ISSN 0016-7606. Permission is granted to authors to post the abstracts only of their articles on their own or their organization’s Web site providing the posting includes this reference: “The full paper was published in the *Geological Society of America Bulletin*, [include year, month, and page number, if known, where article appears or will appear].”

GSA provides this and other forums for the presentation of diverse opinions and positions by scientists worldwide, regardless of their race, citizenship, gender, religion, sexual orientation, or political viewpoint. Opinions presented in this publication do not reflect official positions of the Society.

SUBSCRIPTIONS for 2017 calendar year. GSA Members and Fellows: \$89 (print + online), \$60 (online only). GSA Student, K–12 Teacher, and Early Career Professional Members: \$45 (print only; online included in membership). Nonmembers and institutions: \$1185 (print + online + archive). Details on subscription choices, formats, and pricing at: [www.geosociety.org/pubs/](http://www.geosociety.org/pubs/). For orders, call GSA Sales & Service at +1.888.443.4472 or +1.303.357.1000, or e-mail [gsaservice@geosociety.org](mailto:gsaservice@geosociety.org). Claims for nonreceipt or damaged copies, please contact GSA Sales & Service. Claims are honored for one year; please allow sufficient delivery time (up to 8 weeks) for overseas copies.

## ON THE COVER

Cover: Field photograph of tubeworm fossils found in methane seep deposits formed in Cretaceous sediments, Ellef Ringnes Island, Canadian High Arctic. Chemosynthetic life flourished at these sites of methane release. Part of one of the largest fields of methane seep deposits known, these features demonstrate the occurrence of a large biogenic methane release associated with Cretaceous climate warming. See “Extensive Early Cretaceous (Albian) methane seepage on Ellef Ringnes Island, Canadian High Arctic” by Willisicroft et al., p. 788–805.

Photo by: Stephen Grasby

Cover design by: Eric Christensen
