

CONTENTS

	Page
Algonkian formations of northwestern Montana; by CHARLES D. WALCOTT....	1
Recent changes of level in the Yakutat Bay region, Alaska; by RALPH S. TARR and LAWRENCE MARTIN.....	29
Carboniferous of the Appalachian basin; by JOHN J. STEVENSON.....	65
Paleogeography of Saint Peter time; by CHARLES P. BERKEY.....	229
Glacial phenomena of the San Juan mountains, Colorado; by ERNEST HOWE and WHITMAN CROSS.....	251
Geology of the lower Colorado river; by WILLIS T. LEE.....	275
Guadix formation of Granada, Spain; by WILLIAM HERBERT HOBBS.....	285
Cretaceous section in the Moose Mountains district, southern Alberta; by D. B. DOWLING.....	295
Crescentic gouges on glaciated surfaces; by G. K. GILBERT.....	303
Moulin work under glaciers; by G. K. GILBERT.....	317
Gravitational assemblage in granite; by G. K. GILBERT.....	321
The Okanagan composite batholith of the Cascade Mountain system; by REG- INALD A. DALY.....	329
Observations in South Africa; by W. M. DAVIS.....	377
Geological reconnaissance of the coast of the Olympic peninsula, Washington; by RALPH ARNOLD.....	451
Geology of Diamond head, Oahu; by C. H. HITCHCOCK.....	469
Mohoeka Caldera; by C. H. HITCHCOCK.....	485
Igneous rocks of the eastern townships of Quebec; by JOHN A. DRESSLER.....	497
Lithological character of the Virginia Granites; by THOMAS LEONARD WATSON.....	523
Fish remains in Ordovician rocks in Bighorn mountains, Wyoming, with a résumé of Ordovician geology of the northwest; by N. H. DARTON.....	541
Types of sedimentary overlap; by AMADEUS W. GRABAU.....	567
Interdependent evolution of oases and civilizations. Presidential address by RAPHAEL PUMPELLE.....	637
Proceedings of the Eighteenth Annual Meeting, held at Ottawa, Canada, Decem- ber 27, 28, and 29, including Proceedings of the Seventh Annual Meeting of the Cordilleran Section, held at Berkeley, California, December 29 and 30, 1905; HERMAN LE ROY FAIRCHILD, <i>Secretary</i> .....	671
Session of Wednesday, December 27.....	672
Report of the Council.....	673
Secretary's report.....	673
Treasurer's report.....	675
Editor's report.....	677
Librarian's report.....	679
Election of officers.....	679
Election of Fellows.....	680
Amendment to Constitution.....	681
Memoir of George H. Eldridge [with bibliography]; by WHITMAN CROSS.....	681

	Page
Memoir of Albert A. Wright [with bibliography]; by FRANK A. WILDER.....	687
Chemical evolution of the ocean [abstract]; by ALFRED C. LANE.....	691
Dike of mica-peridotite from Fayette county, southwestern Pennsylvania [abstract]; by J. F. KEMP.....	691
Occurrence of the diamond in North America [abstract]; by GEORGE F. KUNZ.....	692
Nepheline syenite in eastern Ontario [abstract]; by FRANK D. ADAMS.....	695
Geologic reconnaissance map of Alaska [abstract]; by ALFRED H. BROOKS.....	695
Session of Wednesday evening, December 27.....	700
Session of Thursday, December 28.....	700
Sixteenth annual report of the Committee on Photographs.....	700
Resolution concerning International Geological Congress.....	701
Drumlin structure and origin [abstract]; by H. L. FAIRCHILD.....	702
Drumlins of Michigan [abstract]; by ISRAEL C. RUSSELL.....	707
The Lefroy, a parasitic glacier [abstract]; by WILLIAM H. SHERZER..	707
Origin of the massive block moraines in the Canadian Rockies and Selkirks [abstract]; by WILLIAM H. SHERZER.....	708
Glaciation of Manhattan island [abstract]; by ALEXIS A. JULIEN.....	708
Session of Thursday evening, December 28.....	709
Session of Friday, December 29.....	709
Auditing committee's report.....	709
Geology of Ottawa and its environs [abstract]; by H. M. AMI.....	710
Glacial history of Nantucket and cape God [abstract]; by J. H. WILSON.....	710
Geology and paleontology of northern Canada [abstract]; by H. M. AMI.....	711
Gilbert gulf (marine waters in Ontario basin); by H. L. FAIRCHILD..	712
Discovery of the Schoharie fauna in Michigan [abstract]; by A. W. GRABAU.....	718
Calabrian earthquake of September 8, 1905 [abstract]; by WILLIAM H. HOBBS.....	720
Volcanic craters in the southwest; by CHARLES R. KEYES.....	721
Red beds in the Laramie Mountain region [abstract]; by N. H. DARTON.....	724
Tertiary terranes in New Mexico [abstract]; by C. R. KEYES.....	725
Quaternary history of the upper Mississippi valley [abstract]; by WARREN UPHAM.....	725
Distribution of drumlins and its bearing on their origin [abstract]; by FRANK B. TAYLOR.....	726
Geological map of Connecticut, 1905 [abstract]; by H. E. GREGORY...	727
Resolution of thanks.....	727
Register of the Ottawa meeting, 1905.....	728
Session of the Cordilleran Section, Friday, December 29, 1905.....	728
Telachapi valley [abstract]; by ANDREW C. LAWSON.....	729
Igneous rocks of the northwestern Black hills [abstract]; by W. S. TANGIER SMITH.....	729
Pleistocene phenomena in the Mississippi basin; a working hypothesis [abstract]; by W. G. TRIGHT.....	730

	Page
Session of the Cordilleran Section, Saturday, December 30.....	730
Exceptional nature and genesis of the Mississippi delta [abstract] ; by E. W. HILGARD.....	731
Register of the meeting of the Cordilleran Section.....	732
Accessions to the Library from July, 1905, to October, 1906 ; by H. P. CUSHING.....	733
Officers and Fellows of the Geological Society of America.....	743
Index to volume 17.....	755

ILLUSTRATIONS

PLATES

Plate 1—WALCOTT : Map of portions of northwestern Montana and northern Idaho.....	1
“ 2 “ Scapegoat mountain and ridge on west side of Camp creek.....	2
“ 3 “ Holland Peak, Swan range, Montana.....	6
“ 4 “ Southeastern slope of mount McDonald, Mission range, Montana.....	6
“ 5 “ Crest of Mission range, Montana.....	6
“ 6 “ Limestones and siliceous beds of the Castle Mountain group.....	14
“ 7 “ Spokane shales and quartzite beds of Greyson formation.....	20
“ 8 “ Conglomerate near base of Greyson shales.....	20
“ 9 “ Kootenai peak.....	20
“ 10 “ Siyeh limestone.....	20
“ 11 “ Specimens of <i>Cryptozoan frequens</i> .....	20
“ 12—TARR and MARTIN : Map of Alaska, showing location of Yakutat bay.....	29
“ 13 “ “ “ Elevated rock bench and sea-cave, Disenchantment bay.....	36
“ 14 “ “ “ Elevated beaches, Russell fiord and Disenchantment bay.....	37
“ 15 “ “ “ Elevated beaches, Russell fiord.....	38
“ 16 “ “ “ Uplifted alluvial fan and new islands.....	39
“ 17 “ “ “ Barnacles and mussels in place above present tide.....	40
“ 18 “ “ “ Evidences of changes in shore levels.....	42
“ 19 “ “ “ Submerged forests, Knight island.....	46
“ 20 “ “ “ Destroyed forest and parallel faults.....	49
“ 21 “ “ “ Faults and Gannett nunatak.....	50
“ 22 “ “ “ Mountain face, above Yakutat foreland, and submerged forest.....	53
“ 23 “ “ “ Sketch map of Yakutat bay.....	54
“ 24—BERKEY : Cambric and ordovician series in southern Minnesota, Illinois, and Tennessee.....	237
“ 25—HOWE and CROSS : Views across and along Cow creek.....	238
“ 26 “ “ “ Uncompahgre plateau from Horsefly peak and ridge extending northward from latter.....	261
“ 27 “ “ “ Looking southward from a point 4 miles south of West Baldy.....	264
“ 28 “ “ “ Looking north up the Animas valley.....	268

	Page
Plate 29—HOWE and CROSS: Looking south down the Animas valley.....	268
“ 30 “ “ “ Terminal moraines of the Animas.....	270
“ 31 “ “ “ Looking southeast across the Animas valley.....	272
“ 32—LEE: Topographic sketch map of portion of western Arizona.....	275
“ 33 “ Detrital plain in Detrital-Sacramento valley.....	280
“ 34 “ Entrance to Black canyon.....	282
“ 35—HOBBS: Characteristic topography of the Guadix formation.....	289
“ 36 “ Characteristic topography of the Guadix formation.....	290
“ 37—GILBERT: Crescentic gouges.....	314
“ 38 “ Disruptive scars on granite.....	315
“ 39 “ Crescentic gouges in Tuolumne canyon.....	316
“ 40 “ Moulin work.....	318
“ 41 “ Moulin work.....	318
“ 42 “ Moulin work.....	319
“ 43 “ Assemblages of phenocrysts in granite.....	326
“ 44 “ Banded granite.....	326
“ 45 “ Inclusions in granite of Kings River region.....	326
“ 46 “ Compressed inclusions.....	327
“ 47—DAVIS: Gorge of Buffels river and base of Witteberg range.....	448
“ 48 “ Deformed Witteberg series and cobble-covered terrace.....	448
“ 49 “ Table Mountain sandstone and matopo.....	449
“ 50 “ Dwyka tillite and Witteberg notch.....	450
“ 51 “ Dwyka shales and Dwyka tillite.....	450
“ 52 “ Eroded valleys and ridges and glaciated boulder.....	450
“ 53 “ Dwyka tillite and glaciated Barberton slates.....	450
“ 54 “ Glaciated diabase.....	450
“ 55—ARNOLD: Geologic features of coast of Olympic peninsula.....	455
“ 56 “ Geologic features of coast of Olympic peninsula.....	456
“ 57 “ Geologic features of coast of Olympic peninsula.....	462
“ 58 “ Geologic features of coast of Olympic peninsula.....	466
“ 59—HITCHCOCK: Map and section of Diamond head.....	469
“ 60 “ Views of Diamond head.....	475
“ 61 “ Illustrations of Kupikipikio.....	479
“ 62 “ Sections of tuff.....	480
“ 63 “ Exposure of tuff, Diamond head.....	482
“ 64 “ Map of the Mohokea caldera.....	486
“ 65 “ Birds-eye view of Haleakala on Maui.....	488
“ 66 “ Inside of Haleakala at the southwest angle.....	489
“ 67—DRESSER: Map of southern Quebec.....	497
“ 68 “ Map and section, Sutton Mountain series, near Richmond, Quebec.....	507
“ 69—WATSON: Granite quarries in Virginia.....	534
“ 70 “ Granite quarries in Virginia.....	536
“ 71 “ Pegmatite dikes and veins.....	538
“ 72 “ Granite quarry and gneiss inclusion.....	540
“ 73—DARTON: Geologic map of Bighorn mountain.....	541
“ 74 “ Exposures of Bighorn limestone.....	546
“ 75 “ Exposure of Madison limestone on Deadwood flaggy lime- stone.....	548
“ 76 “ Exposures of Bighorn limestone.....	552

	Page
Plate 77—DARTON: Exposures of Bighorn and Whitewood limestones.....	556
“ 78 “ Exposures of Ordovician rocks and Harding limestone... ..	557
“ 79 “ Exposure of the shale member lying between Harding sandstone and Fremont limestone.....	562
“ 80—KEYES: Crater salt lake.....	721
“ 81 “ Mount Capulin, New Mexico.....	722
“ 82 “ Interior of crater of mount Capulin.....	722
“ 83 “ Central plug of mount Capulin.....	723
“ 84 “ Lava fields and volcanic cones.....	723

## FIGURES

## TARR and MARTIN :

Figure 1—Cross-section of northeast shore of Russell fiord opposite Marble point.....	52
“ 2—Sketch map of east coast of Yakutat bay.....	53

## BERKEY :

Figure 1—Areal distribution of the Saint Peter sandstone formation....	231
“ 2—Lower Paleozoic formations.....	233
“ 3—Generalized sketch illustrating relationship of interbedded sandstones to great basal sandstone formation.....	235
“ 4—Stratigraphic range of the basal sandstone.....	241
“ 5—Continental outline at maximum retreat of the seas in mid- Saint Peter time.....	248
“ 6—Continental outline near close of Saint Peter time.....	249

## CROSS and HOWE :

Figure 1—Drainage map of the San Juan region.....	253
“ 2—Sketch map of the Uncompahgre valley.....	255

## HOBBS :

Figure 1—Map of the Guadix and neighboring formations.....	286
“ 2—Type of cross-bedding.....	291
“ 3—Faulted torrential deposits at Rossao, nCalabria.....	292

## DOWLING :

Figure 1—Map of part of Alberta and British Columbia.....	296
---	-----

## GILBERT :

Figure 1—Profile of part of glacier bed.....	305
“ 2—Diagrammatic sketch of crescentic gouge.....	305
“ 3—Cross-section of crescentic gouge.....	306
“ 4—Diagrammatic sections of fractures.....	306
“ 5—Longitudinal section of lower part of a glacier.....	308
“ 6—Longitudinal section of lower part of a glacier.....	308
“ 7—Ideal oblique view of originally plain rock surface.....	309
“ 8—Theoretic deformation of rock beneath a glacier.....	310
“ 9—Theoretic origin of fractures producing the crescentic gouge..	311
“ 10—Theoretic origin of the oblique and vertical fractures of the crescentic gouge.....	311
“ 11—Banding and unconformity in granite.....	324

DALY :	Page
Figure 1—Map showing relation of Cascade range to other members of the Cordillera.....	333
“ 2—Diagrammatic east-west section through the Okanagan composite batholith.....	334
“ 3—Grand plan showing relations of the Osoyoos, Similkameen, and Kruger igneous bodies and the invaded Paleozoic formations.....	335
“ 4—Map of the Similkameen batholith, the Cathedral granite batholith, and the Chopaka basic intrusive body....	337
“ 5—Grand plan showing relations of the Cathedral and Rimmel batholiths and the Ashnola gabbro.....	338
“ 6—Grand plan showing relations of the Rimmel batholith, Park granite, and basic complex.....	339
“ 7—Grand plan showing relations of the Castle Peak granodiorite to the deformed Pasayten formation.....	364
“ 8—Contact surface between the Castle Peak granodiorite and tilted Cretaceous sandstones and argillites.....	365
“ 9—Plunging contact surface between intrusive granodiorite and cretaceous argillites and sandstones.....	366
“ 10—Plunging contact surface between intrusive granodiorite and cretaceous formation.....	367
“ 11—Plunging contact surface between intrusive granodiorite and cretaceous formation.....	368
“ 12—Intrusive contact between granodiorite and nearly vertical cretaceous argillites.....	369
“ 13—Plunging intrusive contact surface between the Similkameen granite and the Chopaka roof pendant.....	370
“ 14—Outcrop of the intrusive contact surface shown in Figure 13..	371
 DAVIS :	
Figure 1—Outline map of area occupied by the Dwyka glacial formation.	379
“ 2—Sketch map of district south of Laingsburg, Cape Colony....	390
“ 3—Rough section of Witteberg range, looking east.....	391
“ 4—Northern face of the southern Witteberg ridge, looking southwest.....	391
“ 5—Eastern wall of Buffels River notch.....	392
“ 6—Southern slope of the southern Witteberg ridge.....	392
“ 7—Detailed section of the Witteberg, Dwyka, and Ecca series...	397
“ 8—General section of folded Witteberg, Dwyka, and Ecca formations, south of Laingsburg.....	406
“ 9—Local section on the bank of the Vaal river at Vereeniging, Transvaal.....	409
“ 10—General section from Johannesburg to Vereeniging....	410
“ 11—View southward along the escarpment of Black Reef quartzite overlying granite.....	434
 ARNOLD :	
Figure 1—Sketch map of coast of Olympic peninsula, Washington....	453
“ 2—Detail map of geology of coastline from cape Flattery and vicinity to New Dungeness.....	459

ARNOLD :	Page
Figure 3—Section along eastern end of Crescent bay.....	460
“ 4—Section of small promontory on coast 2 miles west of Clallam.	466
 DRESSER :	
Figure 1—Lots 13, 14, 15, ranges XII and XIII, township of Quebec.....	508
 WATSON :	
Figure 1—Contact of hornblende-biotite gneiss with granite.....	532
“ 2—Contacts between the gray and blue granites.....	533
“ 3—Relations of the blue to the gray granite.....	534
“ 4—Banded aplite-pegmatite intersecting the blue granite.....	536
“ 5—Contact between blue and gray granite.....	537
“ 6—Faulted pegmatite intersecting blue granite.....	538
“ 7—Pegmatite cutting across the schistosity of the granite-gneiss..	539
 DARTON :	
Figure 1—Typical section across Bighorn mountains.....	543
“ 2—Ideal section showing stratigraphic relations in southern part of Bighorn mountains.....	548
“ 3—Cross-section of Butte near summit of Bighorn mountains, 23 miles west of Mayoworth, Wyoming.....	551
“ 4—Sketch map showing distribution of Ordovician rocks in the Canyon City region, Colorado.....	558
“ 5—Sketch map of Manitou embayment, west of Colorado Springs, Colorado.....	562
“ 6—Map of portion of the northwest, showing distribution of Ordovician.....	564
 GRABAU :	
Figure 1—Diagram illustrating progressive (transgressive) overlap.....	570
“ 2—Comparison of section at Smith sound and Manuels brook, Newfoundland.....	572
“ 3—Diagrammatic comparison of Irish and English cretacic.....	592
“ 4—Diagrammatic view of the relationship of the Black shale of southern Missouri and northern Arkansas in the overlying formations.....	598
“ 5—Diagram of Cumberland ridge showing relationship of interior sea to oceanic channel.....	610
“ 6—Diagram showing planes of sedimentation and relationship of seashore bed.....	614
“ 7—Diagrammatic illustration of compound overlap, actual rela- tionship.....	616
“ 8—Diagrammatic illustration of compound overlap, showing the hiatus.....	616
“ 9—Relationship of the Arbuckle and Simpson and the Stones River and Magnesian formations, and position of the Saint Peter sandstone.....	619
“ 10—Non-marine progressive overlap.....	628
“ 11—Marine progressive overlap.....	628
“ 12—Overlap relation of marine and non-marine beds.....	629

GRABAU :	Page
Figure 13—Overlap relation of marine Chemung and non-marine Catskill beds.....	629
“ 14—Relation of Waverley and Chemung formations to the Pocono and Catskill.....	632
“ 15—Relation of the Upper and the Lower Mauch Chunk and the Greenbrier.....	633
“ 16—Relations of Pocahontas, Raleigh-Bon Air, Sewell, and post-Sharon, interpreted as overlapping marine series.....	635
“ 17—Diagram illustrating relationships of members of Pottsville formation.....	636
 PUMPELLY :	
Figure 1—Areal regions and closed basins of Asia.....	638
“ 2—Diagram of the successive cultures of Anan.....	647
“ 3—Sections through the South Kurgan.....	650
“ 4—Partly idealized section through the Oasis of Anan.....	655
“ 5—Section to illustrate the aggradings and dissections since the founding of the North Kurgan at Anan.....	656
“ 6—Tentative correlation of human and physical events during Quaternary and recent time.....	657
“ 7—Artesian well at Askabad.....	658
 FAIRCHILD :	
Figure 1—Gilbert Gulf shore features.....	713
“ 2—Gilbert Gulf shore features.....	715
“ 3—Gilbert Gulf shore features.....	717
 KEYES :	
Figure 1—Geological cross-section of Crater salt lake.....	722

(84 plates ; 96 figures.)
